

Survey for the project “Multimedia-Instruktion in Sicherem Systemen” (MMiSS)

Dear student

For the project “MultiMedia Instruction in Safe and Secure Systems” (MMiSS) we conduct this survey. In MMiSS we develop a teaching and learning platform with the topic “safe and secure systems”, which will hopefully make your learning easier. The results of the survey will be used to improve the contents and presentation of the courses. You may benefit indirectly from the results because several courses at different universities are optimised this way and maybe you will take such an improved course at a later date.

We would like you to send back the questionnaire anonymously, even if you dropped out of the course before the end. It is important for us to know which reasons caused this.

It is our aim to get as many comments, criticisms and suggestions as possible. For that reason most questions are followed by some space to annotate anything you want.

We would like to thank you for your help!

Information about the project MMiSS can be found at <http://www.mmiss.de>

Hints for completing this questionnaire:

Normally we will offer you different grades to select from. Please mark the right answer with a cross.

Please mark (0) if you do not want or are able to answer a question.

“Notes:” means that you can take the chance to provide more specific information.
